

STEP 1. Remove 6" wooden lid from crate. Only goes with replacement surface.

STEP 2. Remove the foam packaging from inside the box

STEP 3. Remove the L shape timber brackets on the left and right side of the box

STEP 4. Have someone support the slat rod on the screen surface

STEP 5. While the slat rod is being supported remove the aluminium angle support brackets that are supporting the slat rod

STEP 6. Gently lower the slat rod

STEP 7. Raise the pin end of the screen

STEP 8. Remove the motor end of the screen out of the rubber block

STEP 9. Remove motor and the plastic drive from the roller tube

STEP 10. The motor, drive and rubber block are for transport only and are not to be used in the replacement of the screen surface

STEP 11. Once the original surface has been removed from the screen, please follow the above instruction in reverse to repack the screen. Please notify Screen Technics once the original screen surface is ready for collection

Should you have any questions regarding the installation of our projection screens please call our technical sales desk on +61 2 4869 2100 or 0448 008 881 for assistance.
