

Interfit Flat Panel Lift - Vertical Up

Keep your flat panel screen safe, secure and out of sight when not in use.

SIZES TO ACCOMMODATE PANELS: 32" - 55"

A contemporary solution to audio-visual storage, the Interfit Vertical Up and Vertical Down lifts are designed to raise and lower your flat panel screen from custom built cabinetry using a structurally rigid lineal bearing system to make your plasma screen safe, secure and out of sight when not in use.

With a slim-line design and fail-safe mechanism to protect the user and an integrated door opening solution, the Interfit Flat Panel Lift provides a simple, modular approach to what was once a complicated installation.

Ultra safe design, as the mechanism is not driven downwards, thus preventing any potential crush injuries.

Description: Floor mounted vertical lifting devices for flat panel monitors
Construction: Powder coated aluminium frame and mechanism - utilising lineal bearing arms for lift
Features: Integrated door opening solution - low cabinet requirements - Fall arrestor system

Market Segments:

Home
Entertainment

Education

Government

Corporate

Benefits include:

- Integrated door opening solution
- Low line design
- Simple, single trade installation
- Adjustable travel
- Fall-arrestor system

Product Features

- Designed to raise and lower your panel from floor based cabinetry
- Adjustable travel - single trade install
- Integrated door opening solution
- Simple design with failsafe mechanism
